"We are pleased to report net income of RWF 83.5 billion for the first nine months of 2025, representing growth of 19.8% year-on-year. These results reflect solid execution of our strategic priorities in a favorable operating environment characterized by Rwanda's GDP growth of 7.8%, well-contained inflation, and relatively stable currency conditions.

Our ecosystem unlocking strategy continues to progress well. BK Capital's Aguka investment product has grown AUM to RWF 32.7 billion, exceeding our annual target, and we are preparing to broaden distribution across additional digital channels within the Group. BK Pay has also exceeded our original merchant and transaction volume targets as businesses adopt more cost-effective digital payment solutions.

On operational performance, our cost-to-income ratio improved to 37.0%, driven by efficiency initiatives implemented across all our subsidiaries, including benefits from our shared services model. Asset quality remains strong, with our NPL ratio at 3.0% and cost of risk at 1.0%, supporting loan book growth of 17.2% while maintaining credit discipline. Our capital position is robust, with Core Capital at 21.0% and Total Capital at 22.2%, providing capacity for continued growth."

The Board has declared an interim dividend of RWF 11.2 per share, up 7.7% from last year. As we execute on our strategic priorities and benefit from Rwanda's positive economic momentum, we remain focused on sustainable growth and delivering value to all stakeholders."

9M 2025 Financial Highlights

Earnings performance:

BK Group Plc delivered a resilient performance in the first nine months of 2025, with total operating income rising to RWF 203.8 billion, an increase of 7.0% year-on-year. Growth was driven by a 13.5% increase in net interest income to RWF 159.7 billion, supported by healthy loan book expansion and stable margins. Non-interest income declined 11.4% to RWF 44.07 billion, primarily due to contracting foreign exchange income and fees.

Operating Efficiency:

Operating expenses were contained at RWF 75.4 billion, resulting in 90 basis points improvement in the cost-to-income ratio of 37.0% from 37.9% in 9M 2024, helping the Group deliver efficiency gains. This disciplined cost management, combined with strong revenue growth, generated stronger operating leverage and sustainable margin expansion.

Credit Risk & Asset Quality

The NPL ratio declined to 3.0% from 4.8% a year earlier, a 180-basis point improvement reflecting enhanced underwriting standards, proactive portfolio management, and supportive macroeconomic conditions. Net impairment charges fell 47.6% to RWF 12.1 billion, while the annualized cost of risk compressed to 1.0% from 2.1%. These lower credit costs contributed directly to the 22.2% growth in profit before tax and supported the improvement in return on equity. NPL coverage remained at 50.4%, with net NPL coverage at 101.8%, providing adequate buffers against potential credit losses.

Balance sheet growth remained solid:

Total Assets grew 7.6% to RWF 2,712.6 billion (US\$1,879.9 million). Net loans to customers increased 18.6% to RWF 1,703.5 billion while customer deposits rose 3.0% to RWF 1,690.8 billion. The loan book expansion, combined with the improvement in asset quality, supported the growth in net interest income of 13.5%.

Other Key Updates – Interim Dividends

The Board declared an interim dividend of RWF 11.2 per share, a 7.7% increase from RWF 10.32 paid for the interim in 2024.

The dividend increase was supported by the improved profitability and the Group's capital position. Key Dates are:

- **Book Closure:** 8th December 2025
- **Payment Date:** 12th January 2026
